<https://vishnu3825.github.io/Myprofile-protolio/>

Passionate Frontend Developer with hands-on experience in HTML, CSS, JavaScript, Native JS, and React. Skilled in building responsive, user-friendly, and high-performance web applications. I have a strong eye for UI/UX design, transforming complex requirements into clean, intuitive interfaces. Adept at collaborating with teams to deliver scalable and maintainable solutions, while continuously learning modern frontend technologies to stay at the forefront of web development.

### PROJECTS

---

#### Author profile page

Custom-built Author Portfolio platform designed to showcase books, engage readers, and facilitate seamless interactions. Features include interactive book reading UI, follow/unfollow system, like/unlike options, and secure payment integration for book purchases. Built with React for a responsive and modern frontend experience, with a focus on delivering an immersive, user-friendly interface that highlights the author's work and enhances reader engagement.
